

Computer Program Exercise #1

MATLAB Programming Review

Create a MATLAB script called “**cpe1.m**”

Create a MATLAB script which return a list of all values (sorted smallest to largest) that appear exactly three times in the input vector **x**. So if

```
x = [1 2 5 2 2 7 8 3 3 1 3 8 8 8]
```

then

```
y = [2 3]
```
